Character Technology Profile Questions

Imagine that the characters that your group has been assigned live in the modern-day world, just as you do. Assess the characters' understanding and interaction with technology based on what you know about the character and your knowledge of the available technology resources in the world today.

As you work, answer the following questions:

- What kinds of technology does the character own? Does the character know how to use items or does he/she need help to use it?

- What kinds of technology does the character use that he/she doesn't own (for instance, a computer at the library)?

- How often does the character interact with technology? What does he/she use the technology for?

- How does the character feel about technology—comfortable? uneasy? skeptical? appreciative? optimistic? etc. Why does the character feel as he or she does?

- What is the character's biggest fear about technology, and why?

- What technology item (for example, an iPod, a laptop, a cell phone) does the character like the most, and why? Does the character own the technology?

Add any other details about the character's interaction with technologies that you wish.

Be prepared to share your profile with the class.
