

## Scholarly Article Presentation Reflection Questions

After your presentation, respond to each of the following reflection questions. Use the other side of the handout if necessary.

What did you learn about the piece of literature through this activity? Describe one new insight or interpretation about the book or play that the author included in the essay you presented. What was new or surprising about it?

Describe the most effective strategy or technique the author of your article used. Then describe the *least* effective strategy or technique. Why do you think the effective strategy works while the other one does not?

Review the article and describe one technique or strategy your author used that you will consider using in your own future academic writing.
