Animoto Directions

1. Go to animoto.com.

2. Sign in using the teacher code information provided.

3. Click "Create."

4. Choose your theme.

5. Click "Create Video."

6. To type your text, click "Add Text." Put your title in the Header Box, and then use one box for each line or phrase.

7. When all of your text is typed, upload your pictures. Follow these steps:

    1. Click "Add Pics/Videos" on the left side of the screen.

    2. Click "Upload" from your computer.

    3. Using the select files box, find your file and select the pictures you wish to upload and use in your poem.

    4. Next, drag your pictures to where they go in the poem; usually you would put the picture before the text it goes with.

8. To choose music for your poem, click "Choose Music," and decide which song you want to use. It is recommended you use something with few to no words, but the choice is yours.

9. Finally, when you have made sure your text and pictures are in the correct order and you're ready to finish your video, click "Produce Video." It takes a few minutes to process. You can watch it when production is finished. It will also be e-mailed to your teacher so that the class can view the videos together as part of the lesson.
