

## Useful Web sites

[Biomes of the World](http://www.mbgnet.net/sets/index.htm) at <http://www.mbgnet.net/sets/index.htm>

This Web site has great images of the biomes and is easy to read. It includes plants, animals, locations, and descriptions.

[The World's Biomes](http://www.ucmp.berkeley.edu/exhibits/biomes/) at <http://www.ucmp.berkeley.edu/exhibits/biomes/>

This Web site is especially good for finding information about the effects humans have on each biome.

[Plant Adaptations](http://www.mbgnet.net/bioplants/adapt.html) at <http://www.mbgnet.net/bioplants/adapt.html>

This Web site explains how plants adapt to survive in the major biomes.

[Biomes of the World](http://www.thewildclassroom.com/biomes/) at <http://www.thewildclassroom.com/biomes/>

Featuring an interactive map, this Web site also includes animal videos and an informative temperature vs. precipitation chart.

[Mission: Biomes](http://earthobservatory.nasa.gov/Experiments/Biome/index.php) at <http://earthobservatory.nasa.gov/Experiments/Biome/index.php>

This Web site's pages listed on the right describe the plants, temperature, precipitation, location, and physical characteristic for several biomes.

[Habitats/Biomes](http://www.enchantedlearning.com/biomes/) at <http://www.enchantedlearning.com/biomes/>

This easy to read site includes many of the animals found in the each biome.

[Major Biomes of the World](http://www.factmonster.com/ipka/A0769052.html) at <http://www.factmonster.com/ipka/A0769052.html>

This Web site is good for a basic introduction to identifying special features of the major biomes.

[World Biomes](http://www.worldbiomes.com/) at <http://www.worldbiomes.com/>

Although not graphically as interesting as the other sites, this Web site provides descriptions and well as links to other resources.
