

Technology Autobiography Heuristic

Pamela Takayoshi, Kent State University

Recall your earliest experiences with technological artifacts of devices.

- What were they?
- What do you remember about using them?
- What were the popular gadgets in your house while you were growing up?
- What does it mean to be technologically literate?
- Whom do you identify as being most technologically literate in your life?
- How do you measure up?

What technologies . . .

- Are on your desk at home?
- Are you carrying now?
- Are on your technological "wish list"?

Do you think there are social consequences or potential impacts on your lifestyle that depend on your technological capabilities?

- How do you expect to deal with new technologies in the future?
- What advantages and problems do you see with the way you approach technology?

What is your preferred way of learning new technologies?
