

Guiding Questions for Community Interviews

You have several options when interviewing community members about the history mentioned in your section of the song.

1. Name individual items or phrases from your section of the song. Record their thoughts, opinions, feelings, and memories.
2. Present the interviewees with a specific date or decade. Invite them to share what they remember from that time period.
3. Ask the interviewees what year they were born. Record that date. Next ask them to tell you about people, places, and events they experienced as they were growing up. See if any of those items match with your section of the song.
