### Finding Sets of 2 (pairs)

Find 5 things in the world that come in sets of 2 or in a pair.

Examples: eyes, feet, bicycle wheels, gloves, socks, faucets

Cut pictures from magazines or look around your home and make a list of words and pictures.

With an adult's help, use the list or pictures to count (and write) by 2's to 10 (or above 10 if you wish). For fun, try counting backward by 2's from 10, too!
